

Biomedical and Environmental Sciences

INFORMATION FOR AUTHORS

Biomedical and Environmental Sciences, an international journal with emphasis on scientific findings in China, publishes articles dealing with biologic and toxic effects of environmental pollutants on man and other forms of life. The effects may be measured with pharmacological, biochemical, pathological, and immunological techniques. The journal also publishes reports dealing with the entry, transport, and fate of natural and anthropogenic chemicals in the biosphere, and their impact on human health and well-being. Papers describing biochemical, pharmacological, pathological, toxicological and immunological studies of pharmaceuticals (biotechnological products) are also welcome.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communication has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Biomedical and Environmental Sciences* represent the opinions of the authors and should not be construed to reflect the opinions of the Editor(s) or the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Submission of Manuscript. Manuscripts should be submitted to: Mr. QUN ZHANG, Director of the Editorial Office of Biomedical and Environmental Sciences, Chinese Center for Disease Control and Prevention (China CDC) 155 Changbai Road Changping District Beijing 102206 People's Republic of China. Telephone: 86-10-58900404. Fax: 86-10-58900445. E-mail: besj@263.net Website: www.besjournal.com

All copies of halftone artwork must be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process.

Form. Articles should be concise and in English. Manuscripts should be typewritten and double-spaced throughout (including tables, footnotes, references and figure captions); the original typescript should be prepared on one side of a good grade of 8.5×11 in. (21.6×27.9 cm) white paper, with 1 in. (2.5 cm) margins on all sides. Mimeographed or duplicated manuscripts will be accepted only if they are indistinguishable from good typed copies. All pages should be numbered consecutively, including references, tables, and figure legends.

Page 1 should contain the article title, author(s), affiliation(s), a short form of the title (less than 55 characters including letters and spaces), and the name and complete mailing address of the author to whom correspondence should be sent.

Page 2 should contain a structured abstract (about 200 words) which include four parts entitled: Objective, Methods, Results and Conclusion. The structured abstract should describe concisely the substantive content and the conclusions reached. Since the abstract will also be used by abstracting services, it must be self-contained, having no references to formulas, equations, or bibliographic citations that appear in the body of the manuscript.

Standards. Use generic names of chemicals whenever possible. Proprietary names and trademarks should appear only to identify the source of the chemical and subsequently only the generic name should be used. All abbreviations and chemical names should follow the style of *Chemical Abstracts*.

All abbreviations, other than those for standard units, should be defined in the text or in a footnote. Abbreviations should be unpunctuated.

A useful writing guide is the *CBE Style Manual*, 5th ed. published by the Council of Biology Editors, 60 Revere Drive, Suite 500 Northbrook, IL 60062, U.S.A.

Footnotes. Use footnotes only when absolutely necessary, in which case the footnotes should be typed consecutively, double-spaced, on a separate sheet of paper in order of their appearance, beginning with the article title, and identified by superscript Arabic number^{1,2}, etc., in the list and in the text.

Tables and Figures. Tables and figures should be completely understandable even without reading the text. Photographs are desirable wherever necessary to substantiate and illuminate the text.

Tables. Number tables consecutively with Arabic numerals in order of their appearance in the text. Type each table, double-spaced throughout, on a separate sheet; avoid vertical lines. Supply a short descriptive title (typed above the table). Type table footnotes, lettered^{a,b}, etc., directly below the appropriate table, not on a separate sheet.

Figures. Figures should be numbered with Arabic numerals in the order in which they are mentioned in the text. The author's name and the number of each figure should be written on the back of each figure in soft pencil. Wherever it may be ambiguous, the "top" should also be indicated (on the back of the figure). Type legends (double-spaced) together on a separate sheet.

It is essential that all illustrations be drawn with a lettering set or by an equivalent method in finished form ready for photoreproduction. Lettering on original drawings should be large enough to be legible after a reduction of 50 to 60 percent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8.5×11 in., with coordinates properly labeled; or they may be submitted as glossy prints. Grid lines that are to show in the final figure should be inked in black. Photographs and photomicrographs may be submitted as glossy prints (5×7 or 8×10 in.) and should not be marred by staples, paperclips, or pencil marks. Original drawings no larger than 8.5×11 in. are preferred.

Color illustrations will be acceptable only if the author is prepared to cover the cost of reproduction.

References. The references should be numbered in order of citation in the text, the number being placed in square brackets. All references should be listed in numerical order at the end of the text. Abbreviations of journal names should follow the style of *Chemical abstracts Service Source Index*, 1985. Examples of the proper format are:

1. Kolbye A C, JR, Carr C J (1984). The evaluation of the carcinogenicity of environmental substances. *Regul. Toxicol. Pharmacol* 4, 350-354.
2. Schulte-Frohlinde D (1983). Kinetics and mechanism of polynucleotide and DNA strand break formation. In *Radioprotectors and Anticarcinogens* (O. F. Nygaard and M. G. Simic, Eds.), pp. 53-71. Academic Press, New York.
3. Shepard T H (1980). *Catalog of Teratogenic Agents*, 3rd ed. Johns Hopkins Univ. Press, Baltimore/London.

Proofs. Proofs will be sent to the corresponding author, with a reprint price list and order form. Authors will be charged for excessive alterations.

Reprints. Fifty reprints of each article will be supplied free to the corresponding author. Additional reprints may be ordered using the form accompanying the proofs.
