

Supplementary Figure S1. The representative MR images of WMH of different severity and lesion sites.

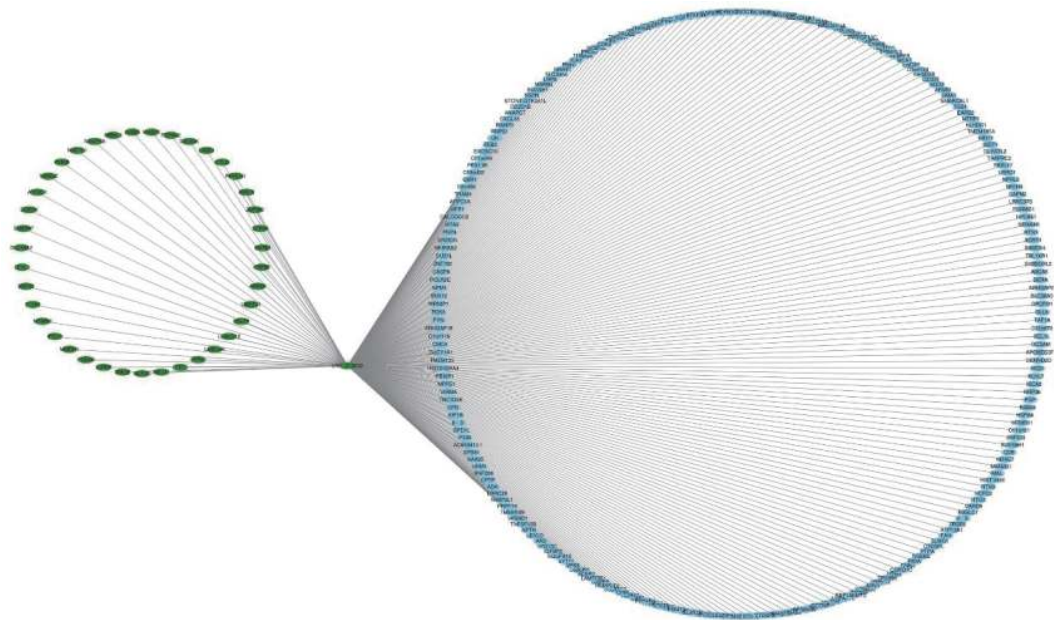

Supplementary Figure S2. The coexpression of lncRNA-mRNA networks of exo-lnc_011797. Upregulated RNAs are denoted in red, and downregulated RNAs are denoted in green; Blue indicates RNAs that are not differentially expressed.

Supplementary Figure S3. The coexpression of lncRNA-mRNA networks of lnc_011776. Upregulated RNAs are denoted in red, and downregulated RNAs are denoted in green. Blue indicates RNAs that are not differentially expressed.

Supplementary Figure S4. The coexpression of lncRNA-mRNA networks of *exo-lnc_004326*. Upregulated RNAs are denoted in red, and downregulated RNAs are denoted in green. Blue indicates RNAs that are not differentially expressed.

Supplementary Figure S5. The coexpression of lncRNA-mRNA networks of *exo-lnc_013222*. Upregulated RNAs are denoted in red, and downregulated RNAs are denoted in green. Blue indicates RNAs that are not differentially expressed.
